

## New Products

Caralium® looks just like slate, ceramic and stone, yet is warmer underfoot, slip resistant, light and easy to handle and extremely durable.

Slip resistant - the surface of Caralium uses the gripX technology to give an R10 rated slip resistant floor.

Stain free and scratch resistant. The special surface treatment means that stains can be quickly and easily removed using a recommended Caralium cleaner. Caralium is highly durable and will not crack or break unlike ceramic tiles even if heavy objects are dropped on it.

Quieter and warmer than ceramic tiles due to its unique construction, making for a more comfortable home.
